## **DETAILED ACTION**

- 1. The replacement sheet of drawing, figure 4 is disapproved by the examiner as containing New Matter. Specifically certain elements in the figure have been altered from the originally filed figure 4. For example element 23 is shaped differently, and the positioning of the bolts is considerably different as well, as well as the positioning of element 18 in relation to element 1.
- 2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1,2,4 and 8-12 are rejected under 35 U.S.C. 102(b) as being anticipated by McCormick.

McCormick shows the claimed invention, including a "Z-drive" which is laterally pivotable about pins 29 and 30 relative to the watercraft. A trim cylinder is provided.

Bell housing 20 as well as an unreferenced bellows/housing is provided about the cardon joint 17. The pivot pins 29 and 30 are positioned as claimed, between the bell housing and lower Z-drive. Therefore either the pivot pins, or the gimbal ring 27 which carries the pivot pins, or both is intermediate the bell housing and Z-drive.

Re "laterally pivotable", such fails to define over steering movement.

Re claim 2, "accommodates" is broad enough to mean "allow to exist", and as such, the pivot tube as claimed fails to define over the inner bearing race or hollow bearing mounted gears at the upper end of the Z-drive.

Re claim 9, since no relationship has been made between the now set forth housing and tube, any of the housings and tubes of McCormick will meet this claim. For example, 25 is a housing, and 19 is a tube, through which the shaft 16 extends.

Re claim 10, such is treated as was claim 2 above.

Re claim 11, such is treated as was claim 9 above.

Re claim 4, "pivot motor" fails to define over the rack and pinion.

4. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over McCormick as applied to claim 1 above, and further in view of DE 3434211.

McCormick fails to disclose the measurement of the angle of the Z-drive.

DE '211 teaches provision of a sensor on a Z-drive for angle measurement.

It would have been obvious to one of ordinary skill in the art at the time of the invention to provide McCormick with an angle measurement means as taught by DE '211.

Such a combination would have been desirable at the time of the invention so as to provide precise orientation of the unit.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bergstedt discloses the claimed invention, including a Z-drive, bell housing 5, cardon housing, as well as an intermediate housing above the Z-drive permitting lateral steering pivoting.

6. Applicant's arguments filed 1/23/2006 have been fully considered but they are not persuasive.

Application/Control Number: 10/536,470

Art Unit: 3617

Applicant argues that McCormick fails to disclose an intermediate piece as claimed.

In response, the steering pivot pins are intermediate to the bell housing and Z-drive.

Applicant further argues that the Gimbal ring of McCormick could not be an intermediate piece, as it is not located between the bell housing and Z-drive.

Such is not correct. Since in fact it's the gimbal ring which essentially mounts the Z-drive to the bell housing, it is therefore inherently positioned thereinbetween, and is therefore "intermediate" the two.

- 7. Claims 3 and 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 8. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
